**Keller Electrical Industries, Inc. named an
Authorized Service and Repair Facility for Polaris Pumps LLC**

PHOENIX, ARIZONA, July 28, 2015 - Keller Electrical Industries, Inc. is excited to announce that we have been named to serve as an authorized repair and service facility for Polaris Pumps LLC in the Southwest United States including Arizona, New Mexico and Nevada.

Polaris Pumps is a manufacturer of State of the Art Submersible Slurry Pumps. Designed to handle the toughest services in a broad spectrum of solids handling and slurry transport applications, Polaris pumps feature a wide selection of wet end configuration options and run dry capable, severe duty submersible motor combinations that enable us to configure a submersible pump solution to meet your specific requirements. The Polaris pump line-up utilizes a modular wet-end platform approach with common wet end components for a given pump size. The final configuration to a plain open suction, mixer or shredder type pump is accomplished by adding kit components that are interchangeable and can be added or changed in the field as necessary. Primarily designed for heavy duty slurry applications, the wet-end components including the strainer are made from abrasion resistant High-Chrome white iron for maximum wear life. CD4MCu duplex stainless steel wet end components are also available for corrosive applications. This enables us to meet the requirements of almost any application ranging from effluent water and waste water disposal, FGD sumps and abrasive slurry transport to food processing waste, wood yard waste and recycling.

Founded in 1982, Keller Electrical Industries, Inc. is a leading provider of industrial electrical motor repairs and service, custom motor control manufacturing and distributor of heavy duty motors and equipment. Keller boasts a state-of-art facility which houses the Company's corporate headquarters along with its manufacturing, repair, electrical engineering and design divisions, as well as a product distribution facility. The 105,000 sq/ft. facility includes 270 KW of roof-top solar power generation that provides a significant portion of the Company's energy consumption needs. The facility includes the most modern and technologically advanced motor repair, manufacturing, production and testing equipment available in the world. Keller's team represent over 1,000 years of combined experience and have the training and skills needed to support today's industry.

To put Polaris Pumps to work for you, contact our Sales department, by phone: (602)437-3015 or by e-mail: sales@kellerelectrical.com to coordinate and schedule service or repair.

Keller Electrical Industries, Inc. is headquartered in Phoenix, Arizona and provides services throughout the state and southwest including California, Nevada, Utah and New Mexico. More information about the company is available at www.kellerelectrical.com.
